Vetle Lid Larssen

## *The Stargazers*

A historical page-turner inspired by actual events. Three men. A dizzying goal. A desperate journey through Norway. In 1767, Maximilian Hell, imperial court astronomer in Vienna, is given a surprising task: To travel as far north and east as it is possible to get in the known world to observe the passage of Venus. It's a 5,000 kilometre journey, under brutal conditions, to the most inhospitable place on Earth, Vardø in Norway, with one overriding goal in mind: to determine the Earth's distance from the sun. It is an expedition that will take several years, equipped with the most advanced technology of the time, followed with a keen eye by the planet's scientific elite, faced with unsolvable problems: logistics, isolation, internal contradictions and violent forces of nature. But Maximilian Hell has God on his side; and the not so successful Norwegian Jens Finne Borchgrevink as his personal guide.
