Ola Tunander

The Libya War *The use of rhetoric and deception to destroy a state*

The war in Libya has become a humanitarian disaster. This book reveals the dishonest methods that were used to influence world opinion to accept the need for a “humanitarian intervention” in Libya in 2011. It draws a picture of an operation in which a number of actors collaborated towards a common goal: to oust Libya’s leader Muammar Gaddafi . In 2011, the news media reported that Gaddafi had launched a genocide. Today we know that this claim was false. This book explains what actually happened during the war in Libya, and how everyone was deceived.
