Bjørn Andreas Bull-Hansen

Fall of the Kings

This is the fifth book in the Jomsviking series about Torstein and his family. Here, we are taken into the conflicts surrounding Olaf Haraldsson, later known as Saint Olaf, and are given an insight into a age when Norway went from being a society with a council of chieftains and local autonomy to a monarchy with centralised power. Through Torstein's eyes, we see the old days and everything he knows to be good and right coming under threat. At the same time, Torstein himself will threaten Olaf right at the heart of his power – because Torstein wants to retake Vingulmork, the region he was promised dominion over before it was robbed from him.
