Asteroids

They streak into the atmosphere with sparkling tails, sometimes causing enormous destruction. A beautiful book for young readers on a fascinating topic.
What is a shooting star? What can these luminous streaks in the night sky tell us about our solar system and the universe? Is it really true that a huge asteroid led to the downfall of the dinosaurs? Geologist and science communicator Victoria Sjøholt Engelschiøn shares with us the fascinating answers in this beautifully illustrated book about asteroids.

Victoria S. Engelschiøn and Jakob Fløtre Eiring (ill.)

Victoria S. Engelschiøn (b. 1989) is a geologist and paleontologist. After writing her Master's thesis on fossil lizards from Svalbard at NTNU and the Natural History Museum, she worked on manned spaceflights to the moon at ESA's European Astronaut Center in Cologne, Germany. She is currently writing her doctoral thesis on what fossils from the ocean floor can tell us about major changes in the ocean
Jakob Fløtre Eiring (b. 1996) is a filmmaker, animator and illustrator. He completed his Bachelor's degree in animation from Volda University College with an award-winning exam project, the short film PANDICULATION (2020).
