The House Sparrow *The Bird That Conquered Civilization*

The house sparrow, *The Bird That Conquered Civilization* is a captivating and thought-provoking exploration of the interaction between nature and man.

Throughout the ages, the house sparrow has been man's faithful companion – a small and seemingly insignificant bird, but with an overwhelming ability to adapt to the environments we create. Glenn-Peter Sætre takes us on a sensational journey that sheds light on how the house sparrow has followed the development of humanity, from ancient farming societies to today's big cities.

From Harappa of the Indusian civilization to ancient Athens, from the neon-flashing boulevards of Las Vegas to the train stations of Siberia, the house sparrow is emerging. Why has the house sparrow become a global success in our modern world? The book sheds light on the species' close ties to human culture, migration and history, and provides insight into the whimsical mechanisms of evolution and the adaptability of the house sparrow.

Through the story of the house sparrow, we are invited to reflect on our own impact on the world.

Next – Glenn-Peter Sætre

The author Glenn-Peter Sætre is a trained biologist and is a professor of evolutionary biology at the University of Oslo. He has particularly researched speciation among birds.
