## *Arc Radiaton*

People usually had an unlucky number that they tried to avoid. I had an entire multiplication table. Things happened every four years. As if the four times table was to blame. It started with mum dying when I was four. Then grandma had a stroke when I was eight. She died when I was twelve. Birger disappeared into his own world when I was sixteen. What would happen in two years?

## Helene Guåker

---

Helene Guåker has studied crative writing at Telemark University College as well as Nordic Literature at the Univeristy of Agder. She has written several books for adults and Young adults.
